

~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8802

SESSION NUMBER: 2

DATE OF SESSION: 15 MAR 88

DATE OF REPORT: 15 MAR 88

START: 1343

END: 1425

METHODOLOGY: CRV

VIEWER IDENTIFIER: 018

SG1B

2. (S/NF/SK) VIEWER TASKING: When it seemed that the target structure had been acquired, 018 was moved inside to explore it in Stage 4.

3. (S/NF/SK) COMMENTS: The monitor is fairly confident that 018 acquired and described the target structure.

Note: 018/Session #1 was an abort.

memorandum

DATE: 15 March, 1988

REPLY TO
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

SG1J TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics: Viewer: 018
Session date: 15 MAR 88
Start time: 1343
End time: 1425
Mode of operation: CRV

2. (S-SS) Cueing:

- a. 6-digit encrypted coordinates.
- b. Provide a general description of the site.

3. (S-SS) Results:

a. The area appeared to be land with at least one structure. There were strong impressions of missile-like silhouettes and short, solid structures in the distance.

b. The main structure at the site appeared to be a dark room which looked off into other rooms. These other rooms had tables/worktables/desks around the sides of the room, but no free-standing tables. The tables appeared to be work areas, some having rags, rods, etc. (as opposed to business-type desks).

c. Activity at the site appeared to be that of working on large, long, round, metallic "things" which appeared to be a dull greenish color. It appeared that the worker I accessed was standing, working on this "thing" from underneath (it being overhead). There was an impression that the activity going on was that of assembly, but this was accompanied by the feeling that the assembly was of an "adding to" type, rather than initial construction.

d. There was a repeated impression of an odor I remember from my own personal past experience (see bottom of page 4). This smell was exactly like the special "light" oil used in the direction-sensing potentiometers of the old Nike Ajax and Nike Hercules (guided missile systems) firing control computers (analog computers use variable potentiometers instead of digital components).
